

# Bird species of Playa de Oro

by Olaf Jahn

October, 2003

For taxonomy, sequence, and English names I follow Ridgely & Greenfield (2001). Key to confirmation status: 1= confirmed record (e.g., photos, sound recordings); 2= confirmable record (i.e., identification of sound recordings or photos need further confirmation); 3= un-confirmable record (e.g., sight and/or acoustical records without any confirmable documentation like sound recordings or photos); 4= uncertain record (e.g., un-confirmable sight records of species that may cause difficulties in their field identification; species not seen well enough to assure the correctness of identification with certainty, etc.). The confirmation status of species in category 2, 3 and 4 will be described in detail in an appendix to "Jahn, O. (*in prep.*): A Bird Community of the Ecuadorian Chocó: Survey Methods, Ecology, and Use of Avifaunistic Data in Development and Conservation Projects. Ph.D. dissertation. Faculty of Life Science and Mathematics, University of Bonn, and Alexander Koenig Research Institute and Zoological Museum, Bonn, Germany".

Please contact the author (e-mail: <[OlafJahn@andinanet.net](mailto:OlafJahn@andinanet.net)>) in case you should obtain confirmable records (i.e., photos or sound recordings) for any of the species listed here in confirmation status category 2, 3 or 4 and, of course, for any species that is new to the list.
