

RIO SILANCHE BIRD SANCTUARY BIRD CHECKLIST

Updated April 2008

The number codes give a general idea of your chance to see a bird on a short visit. Code 1's are common or conspicuous species that you have a good chance to see on any given day. 2 means an uncommon species, or a shy bird that can be difficult to see even if it might be common. Code 3 birds are either rare, very difficult to see, or both. Species marked with an asterisk(*) have only been recorded along the entrance road from the main highway, and not on reserve property. Taxonomy follows Ridgely & Greenfield *The Birds of Ecuador*, 2001, with some recent updates. Please email any new records (with details) to info@mindocloudforest.org.
